SECURITY RIBBON

The generic holographic patch ribbons allow the application of a hologram (an optical variable design) on card in a form of a transparent patch.

Thanks to these ribbons, you add security and durability to your cards. A hologram is not possible to duplicates and simplifies the examination process.
ADVANTAGES

Your cards are protected against forgeries and falsification. Excellent durability for long-life cards.

Tested and validated by Evolis R&D and Quality departments, these consumables bring you quality and reliability.

CUSTOM HOLOGRAM SOLUTION

Generic holograms are not recommended for high security card programs. Adding security to your badge can require designing a custom hologram film. In addition to this generic offer, Evolis proposes a Custom Hologram Solution. Managed as a special project at Evolis, this film will be designed according to your company requirements. This is the guarantee that it will not be sold by anyone else.
