**Do everything
with BV5100 worry free**

The BV5100 is so different from average phones out there. It's built to endure water, dust, shock, and drops. It can be thrown into any harsh environments that a normal phone can not bear, like swimming pool, muddy road, rocks.

Blackview

MIL-STD-810G

IP68 | IP69K

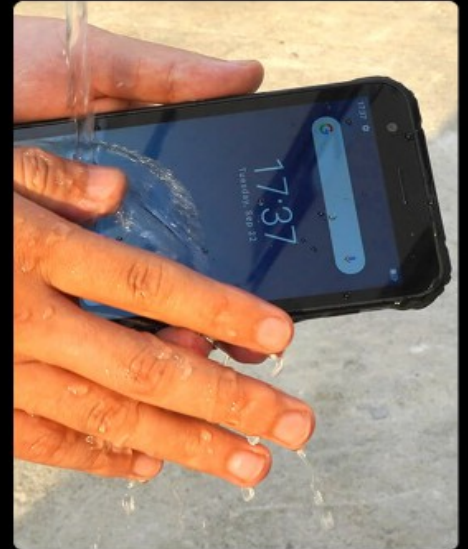

1.8m drop

Small drops or massive waves, it withstands it all.

Tough-as-nails design makes it withstand drops in the rough jobsites

Feel free to rinse under the tap to remove dust

Reliable for camping, hiking, backpacking, or any other outdoor activities

Try something different - Take photos and videos on and under the water

Extremely solid structure contributes to exceptional toughness

Blackview

* Upgraded bonding method for integral reinforcement and protection

* Closed, airtight cavity for outstanding waterproofness.

* Plated with superb TPU for strong wear resistance and anti-drop capabilities.

* Thickened corners offering great buffer when dealing with drops, crash, bumps.

* Thickened glass plate for upgraded toughness

* Elevated sealing capability for better waterproofness.

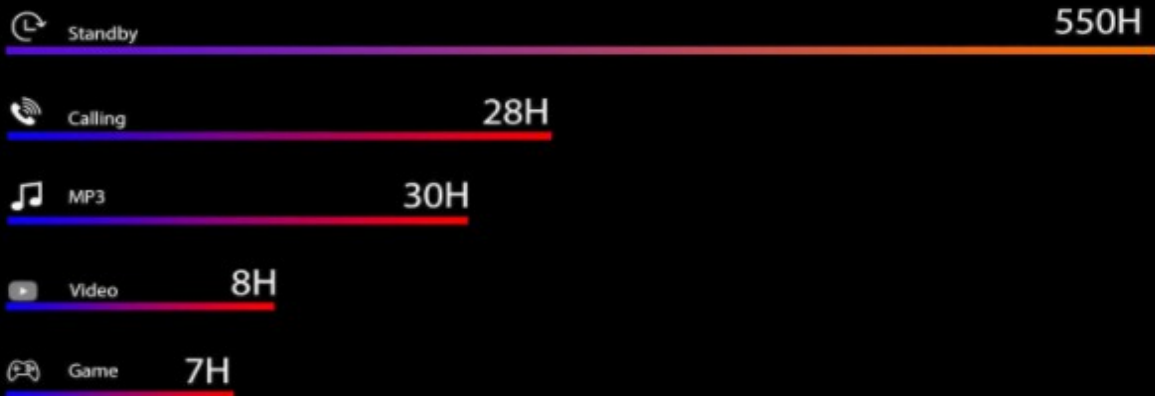

* Made of tough aluminium alloy. Great durability.

Reliable features for demanding use

Keep you connected above a day long
with 5580mAh battery

Whether you're hiking, backpacking or in any other outdoor activities, having your phone standing-by is a peace of mind. The BV5500 is equipped with an above-average 5580mAh battery with standby time of 550 hours. It's able to accompany you during all your activities, above a day long.

Navigate worry free with the BV5100 even though it's a big battery drain.

Make your journey as pleasant as possible. No need to rack your brains to maximize your smartphone's battery life in a journey.

Blackview

Support wireless charging

The BV5100 supports 10W wireless charging, saving you the hassle of dealing with cables — just drop your phone on a pad and watch everything light up. No need to plug and unplug each time. It also keeps your table neater.

Note: the wireless charging pad is not included in the package.

GPS & GLONASS & Beidou & Galileo More Is Better When It Comes to Satellites

The BV5100 combines GPS & GLONASS & Beidou & Galileo advanced quad navigation system, offering higher chances of getting a position fix and more accurate positioning. Combined with the long lifespan of battery, it gives you ideal geolocation wherever you are.

Dedicated One Touch Customized Function Button

- Start Soundrecording
- Open Flashlight
- Screenshots
- Open Underwater Camera
- Open PTT
- Open SOS
- Open Game Mode

Fingerprint Unlock

Side-mounted fingerprint sensor, easy to reach. Unlock in a wink. No need to input password or draw the complicated pattern.

Multi-function NFC

The user-friendly NFC function allows you to use Google pay, buy public transport tickets and share files with other smartphones.

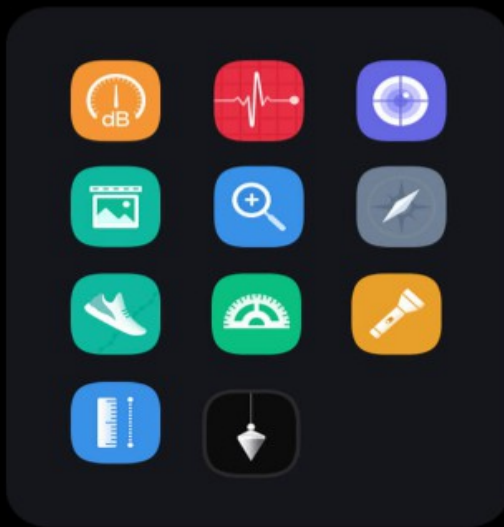

Two LED Lights

When you're on the road or walking through foliage at night, it's nice to be able to reach into your pocket and pull out a helpful flashlight.

SOS

When you're on the road or walking through foliage at night, it's nice to be able to reach into your pocket and pull out a helpful flashlight.
